

I oppose being able to use cell phones on planes for the simple reason of aggravation amongst passengers. Isn't it annoying when someone is using their cell phone at a restaurant or movie theater? Having worked as a flight attendant I have seen enough incidents in which people are easily fueled to cause violence and shout obscenities. Furthermore, from a flight crew perspective, the use of cell phones could be harmful in trying to gain passengers attention in emergency situations. As a crew member and as a paying passenger, please do not allow the use of cell phones!
